

DEEPWATER HORIZON OIL SPILL (BP OIL SPILL) APRIL 20, 2010

Date: 4/20/2010

SOW- Remove 4,900,000 pounds of oily material from the beaches on the Louisiana shoreline using floating boom, skimmer ships and controlled burns.

Bales Environmental was the Direct Manager for the primary management company O'Brien's Response Management.

Deepwater Horizon is considered to be one of largest oil spills in the history of the petroleum industry discharging 4.9 million barrels of petroleum.
